LASER TV 100L5F

Hisense

100" Ambient Light Rejecting (ALR) Screen Included

Great Picture, in Any Viewing Environment.

Designed for watching in any room in the house, the Ambient Light Rejection in the Hisense Laser TV screen utilises anti-glare technology, blocking over 85% of glare. The picture is bright and detailed in all types of lighting, letting you enjoy the ultimate large-screen viewing experience in various room conditions.

Enjoy high image quality, bright environment is not a problem.

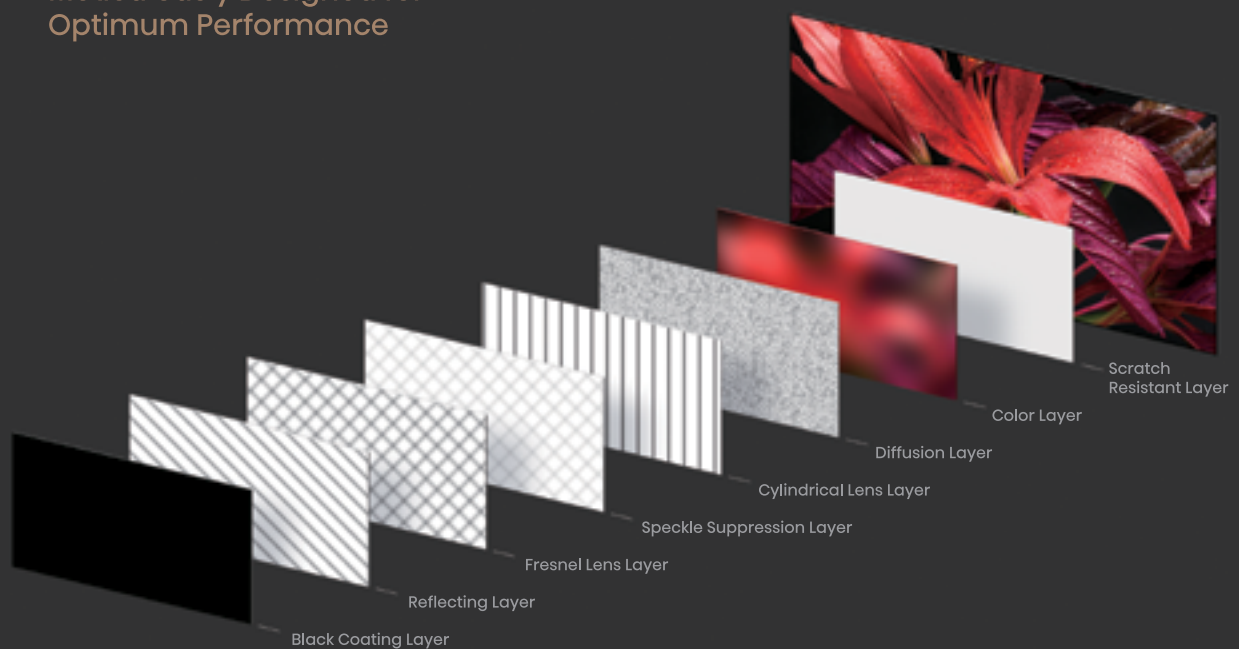

Under the light, the definition of the screen is completely unaffected.

8 Optical Structure Layers

Meticulously Designed for Optimum Performance

Calman Calibration

A Perfect Paired Solution

As one of the only Laser Systems that always comes paired with its screen, Hisense Laser TV is perfectly calibrated to the exact screen it arrives with. It is a perfectly paired solution for a cinema experience at home.

High Dynamic Range (HDR)

See Depth in Every Detail

All Hisense Laser TVs are calibrated to follow the EOTF Curve, which more accurately represents brightness the way directors wanted in any piece of HDR content. You can enjoy a stunningly vibrant picture with incredible depth and rich details.

Smooth Motion

Excellence in Action

Through MEMC Technology with a microsecond-level processor response time, a motion rate 10-times faster than other TV's can deliver. Fast-moving images are smooth and clear, creating an unprecedented viewing experience for sports, action movies and gaming.

Dolby Atmos Audio

A Sound that Puts You Inside the Action

A leap forward from surround sound, DOLBY ATMOS® transports you from an ordinary moment into an extraordinary experience with moving audio – sound that fills your room and flows around you with breathtaking realism to create a powerfully moving entertainment experience.

VIDAA 4

A Real Smart TV

VIDAA

Enjoy all the benefits of our VIDAA 4 OS and effortlessly switch between all your favourite apps (such as Netflix, YouTube, Prime Video, Stan, Kayo, Foxtel and more) to extend your entertainment experience.

And watch live TV with the built-in TV tuner and catch up on the latest programmes. It can receive, process and display the broadcasting TV signal, it is a real TV.

Germany TÜV Rheinland Low Blue Light Certification

Watch Comfortably, with No Eyestrain or Fatigue

Tested and accredited by Germany TÜV Rheinland Low Blue Light certification, nearly zero harmful blue light generated from Hisense 100L5F LASER TV. Your eyes would stay comfortable even after a long-time of watching.

X-Fusion™

Pioneering Laser Technology

X-Fusion™ technology utilises a precise source delivering sharper images, more natural colours and 25,000+ hours of entertainment.

Connectivity

With four (4) HDMI ports available, easily connect all of your audio/video systems and components from a simple cable box to the latest in gaming devices, 5.1 surround sound systems and more. Also, with ARC HDMI, the TV can connect to compatible audio devices through one single HDMI cable.

4K Ultra Short Throw Technology

The 4K Ultra Short Throw LASER TV with a minimalist design is much easy to install. The light-weight and slim screen can hang wirelessly, inconspicuously—elegantly to ensure a beautiful wall mounted fits any rooms and perfectly integrated into your lifestyle.
